

To our valued suppliers,

The American Heart Association will soon be implementing a new financial system, Oracle Cloud, set to launch in late July 2025. This modernized system will enhance our financial operations and drive value for our organization. As part of this transition, we will also be moving to a new supplier portal offering expanded capabilities designed to enhance efficiency and improve your user experience.

Please stay tuned for updates and training resources as we approach the launch date. Your support will be crucial for a smooth transition, and we thank you in advance.

What to do now: Please review the attached FAQ for more details and answers to common questions. You can also visit <https://supplierresources.heart.org>, which will remain the place to go for resources and will be updated as we approach the transition date.

Thank you,

Greg Setser
